

Programming Task Log

Date	Start	End	Interruptions	Task
21/10/2018	12:45	1pm	Had just completed previous tutorial so my brain felt fried. Decide to try and be productive in some form.	Research!
22/10/2018	15:00	15:40	-	Tried to utilise a jump with AddForce. Didn't work too well (see Journal PDF)
25/10/2018	08:54	11:22	I got hungry and spent time making snacks but didn't record the how long.	Changed AddForce to utilising velocity instead. Fixing issue this created with raycasting a grounded variable.
02/11/2018	22:00	22:30	-	Digitalizing Task Log and Journal, created a nice neat folder for the submission.
